INTRODUCTION

The world where we live now is facing more issues related to career choices and being alone due to the pandemic that we are facing. Pursuing your passion or dreams, especially when they are not exciting your family, is a difficult choice to make. Most people kneel in front of the desires of their families. While growing up, the passions fade away in the light of responsibilities.

Not only elders, the youngsters; pursuing a different domain from their interest feel the burden to live up to the expectations of everyone around, but the people who love writing quotes and short stories need pen and paper. Financial stability plays a vital role in one's life, so to balance the space between dreams and work should be kept.

It inspired me to create a website for the people who love to write but could not take it up as a career, so I decided to create a platform where people can write in a hassle-free way to keep their minds healthy in such difficult times.

EXISTING SYSTEM

Wordsmith is a distinct initiative idea as there are not many platforms that are provided to writers to write content. The questions that might arise are how this website is unique from all the other previous websites?

1. There are not much writer specific websites in the market rather there are few apps like Wattpad and YourQuote, etc. So, trying a new way is what makes this site different from others.
2. For writing writers still use Notepad and Microsoft word so a change in environment would be another different quality from the existing platforms.
3. Attractive visuals will be another plus point as the existing systems are not so attractive.

USE OF THE PROJECT

This project is built as an initiative for the comfort of the people who loves to write but due to their involvement other things like household, job and business have lost their interest.

It is to help the interested writers to write their stuff and save it in a well-organized manner. The attractive visuals will motivate them to continue their writing.

In this world of pandemic, people are suffering a lot due to the loss of their dear ones, financial crisis or depression; this project will help them get indulged in an activity they love to escape out from their problems for some time and have some me time.

Feasibility of Project

Wordsmith is a website focusing on writing. It will help people who want to vent out their feeling in low times or to the people who enjoy writing in various genre.

Technologies used in this project are thoroughly studied and worked on. This website is free of cost for users as it does not need any specific hardware except for mobile or computer which makes this project highly feasible .

FUNCTIONAL SPECIFICATION

1. Genre – this lets you choose the category of the content you are going to write.
2. Background – this lets you choose a specific background while you write according to your mood.
3. Content saved- Your previous work will be saved.
4. Interactive- user friendly site.

Software Specification:

- Technology Implemented : HTML, CSS, Bootstrap
- Language Used : JAVASCRIPT
- User Interface Design : HTML, CSS, Bootstrap
- Web Browser : Google chrome, Firefox, Microsoft Edge

Hardware Requirements:

- Processor : intel processors
- Operating System: windows
- RAM : 4gb minimum
- Hardware Devices: Laptop or desktop computer
- Hard disk : 1 TB

FUTURE SCOPE

Wordsmith is a website that help people cope up with the stressful environment by keeping them involved in writing and helping them acquire it as a skill not just passion and love for writing.

This website could help many people who wants to write something even as small as a quote of a few lines or words, this will help them motivated and keep growing their writing skills.

The main agenda about creating this website is to let people take out time for themselves and their lost interests in writing due to various reasons.
